

Cad Designers Wireless Telecom Introduction Cover Letter

Wireless Telecom Drafting/Drawing Services:

Cad Designers has been in business since 1999. We have worked as a consultant to many engineering companies involving a wide range of experience in the Wireless Industry. Drawings are produced to the standards specified by our clients. We have completed over 10,000 Wireless Telecom sites across the Country, including Site Audit, Site Sketch, Lease Exhibit, Construction Drawings and Site Modifications for Collocations, Monopoles, Lattice Towers, Guyed Towers, Rooftops, and Water Tanks. Our goal is not only to meet, but always exceed your expectations.

We meet the exacting deadlines that the Telecom industry expects. We charge a flat fee for each service and have the ability to meet your deadlines.

Cad Designers has become one of the leading Cad drafting service companies by providing dependable, professional services at a competitive price. In today's economic climate, contracting your drafting needs is smart business. While many of our larger clients utilize Cad Designers as an overflow solution, our smaller clients tend to use Cad Designers for all of their drafting needs. Outsourcing your drafting to Cad Designers can save your company money by not having to direct hire additional staff at times of economic uncertainty. When the need arises, we can help you complete your project without adding any long term overhead costs.

We take pride in our QA/QC program. We ensure that each project is thoroughly reviewed and correct prior to being delivered to our clients. It is our goal to minimize revisions. This can be done by properly preparing before each project begins. We have an initial kickoff with all of our clients so we may completely understand their goals and objectives. As we complete a few projects for our clients, the revisions are reduced to a minimum. We provide a 24 hour turnaround for all redlines. It is our goal to give you a final product that meets your objectives, on time and 90% error free.

Thank you for your consideration,

Charlie Seymour

Exceeding Expectations

Philosophy:

Our Philosophy is simple: Customer, Time Management and Quality Assurance. Our Customer is the most important. We strive to communicate and provide our customer what they need when they need it.

We understand that in the fast paced telecom industry time management is crucial. We have met every deadline asked of us, but we have also turned work down that we knew could not be completed in time.

We have an outstanding Quality Assurance program. Every drawing is reviewed and checked to make sure it matches the template provided by our clients. We expect to have the drawings at 90+% by the time our clients review the drawings.

It is our goal to be a leader in the Wireless Telecom Drawing/Drafting field. We feel that with our Customer, Time Management and Quality Assurance Philosophy, we can meet or exceed your expectations.
