

Cad Designers Environmental Drafting Introduction Cover Letter

Environmental Drafting Services:

Cad Designers has been in business since 1999. We have worked as a consultant to many Environmental Engineering firms involving a wide range of projects. Drawings are produced to the standards specified by our clients. We have completed over several hundred sites across the Country, including Phase I and Phase II Environmental Site Assessment diagrams, Geologic Cross Sections, Well Elevation Drawings, Wetland Delineations, Site Plans/ Specifications and Installation Details. Our goal is not only to meet, but always exceed your expectations.

We meet the exacting deadlines that the Environmental industry expects. We have the ability to meet the fast pace required for any project need. All work is completed by our drafting professionals from our office in Raleigh, North Carolina.

Cad Designers has become one of the leading CAD drafting service companies by providing dependable, professional services at a competitive price. In today's economic climate, contracting your drafting needs is smart business. While many of our larger clients utilize Cad Designers as an overflow solution, our smaller clients tend to use Cad Designers for all of their drafting needs. Outsourcing your drafting to Cad Designers can save your company money by not having to direct hire additional staff at times of economic uncertainty. When the need arises, we can help you complete your project without adding any long term overhead costs.

We take pride in our QA/QC program. We ensure that each project is thoroughly reviewed and correct prior to being delivered to our clients. It is our goal to minimize revisions. This can be done by properly preparing before each project begins. We have an initial kickoff with all of our clients so we may completely understand their goals, objectives and preferred drawing formats. As we complete a few projects for our clients, the revisions are reduced to a minimum. We provide a next business day turnaround for all redlines. It is our goal to give you a final product that meets your objectives on a fast paced timeline.

Thank you for your consideration,

Charlie Seymour
