

# Cad Designers Wireless Telecom Introduction Cover Letter

## Wireless Telecom Drafting/Drawing Services:

Cad Designers has been in business since 1999. Cad Designers specializes in and has a wide range of experience with the Wireless Industry. We have completed over 15,000 Wireless Telecom sites across the Country. Drawings are produced to the standards specified by our clients. Our goal is not only to meet, but always exceed your expectations.

We meet the exacting deadlines that the Telecom industry expects. We charge a flat fee for each service which includes redlines. We have the ability to meet the fast pace required for wireless telecommunication deliverables. All work is completed by our drafting professionals from our office in Raleigh, North Carolina.

Cad Designers has become one of the leading wireless telecom Cad drafting service companies by providing dependable, professional services at a competitive price. In today's economic climate, contracting your drafting needs is smart business. While many of our larger clients utilize Cad Designers as an overflow solution, our smaller clients tend to use Cad Designers for all of their drafting needs. Outsourcing your drafting to Cad Designers can save your company money by not having to direct hire additional staff at times of economic uncertainty. When the need arises, we can help you complete your project without adding any long term overhead costs.

We take pride in our QA/QC program. We ensure that each project is thoroughly reviewed and correct prior to being delivered to our clients. It is our goal to minimize revisions. This can be done by properly preparing before each project begins. We have an initial kickoff with all of our clients so we may completely understand their goals, objectives and preferred drawing formats. As we complete a few projects for our clients, the revisions are reduced to a minimum. We provide a next business day turnaround for all redlines. It is our goal to give you a final product that meets your objectives on a fast paced timeline.

Thank you for your consideration,

*Charlie Seymour*
